Bipharma

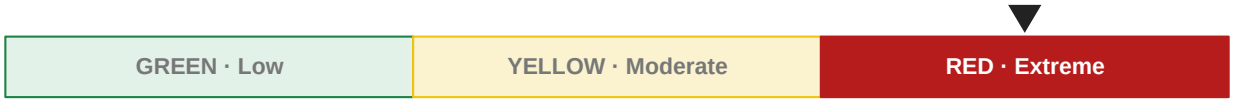
Risk report · Red level · DO NOT ACCESS

Informative report · British English
Prepared without accessing the site · November 2026

RISK LEVEL

RED

EXTREMELY DANGEROUS. This site must NOT be accessed. This report was prepared without accessing the site.



1. Important Notice

- **This site must not be accessed.** No tool, including Tor Browser and a VPN, makes access safe or lawful.
- **The site was not accessed** in preparing this report. There was no visit, registration, purchase, contact or download. The information was obtained **by external means**, from the description provided to the repository's maintainer.
- The information **has not been independently verified**: the site's existence, current state (online or offline) and operators have not been confirmed. As a precaution, the red level is kept even if the site is offline or replaced by a copy.
- The site's address is **not recorded** in this document or in the repository.

2. Site Profile

Field	Information
Site name	Bipharma
Type of activity	The largest drug pharmacy in Europe
Folder identifier	DARK-012-Bipharma
Repository category	Dark Web · Illicit marketplace
Risk level	RED · Extreme risk
Previous level	UNKNOWN (version 1.0)
.onion address	NOT RECORDED
Method of research	External information, without accessing the site
Site status	Not verified
Report date	6 November 2026

3. What the Site Does

Bipharma was described as the **largest drug pharmacy in Europe**: a site that presents itself as an online drug "pharmacy" on the dark web, aimed at the European market. The name suggests a link to pharmaceutical products, and the offering may include illicit drugs and medicines sold without a prescription. The word "largest" is the description received and has not been independently verified.

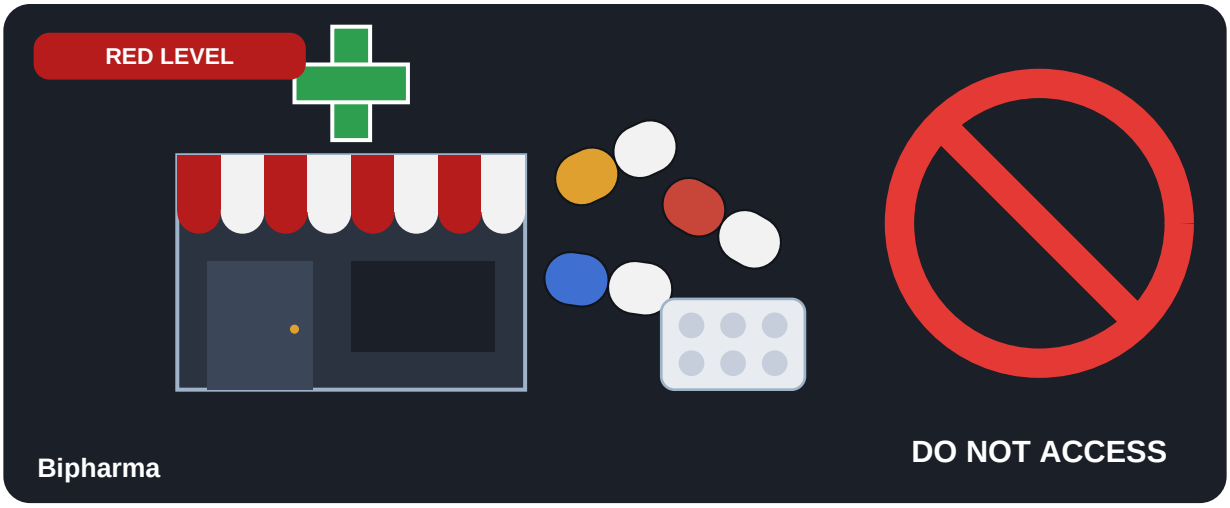
This report does not detail products, prices or operators, because the site was not accessed and the information has not been verified.

Reclassification: in reassessment no. 1 (version 1.1), on 6 November 2026, Bipharma moved from unknown risk to **red**.

Nature of the activity

- **Illegal sale of drugs** on a scale described as large, with European reach.
- **Possible supply of medicines without a prescription**, with no health oversight or involvement of a healthcare professional.
- **Cross-border nature**: it involves international shipping and the jurisdictions of several countries.

4. Illustrative Image



Conceptual illustration created for this report. It is not a screenshot, because the site was not accessed.

5. Why It Is Red Level

The red level is applied when there is at least one indicator of extreme danger. In this case:

- **Illegal trade**: selling controlled drugs, or restricted medicines without a prescription and a licence, is an offence in the European Union and most countries (for example the *Misuse of Drugs Act 1971* and the *Human Medicines Regulations 2012* in the United Kingdom, the *Opiumwet* in the Netherlands and Law 11,343/2006 in Brazil).
- **An illegal pharmacy is not a pharmacy**: no licence, no pharmacist and no control over origin, composition or dose.

- **Counterfeit or adulterated products**: a serious risk to health, including poisoning and overdose.
- **Scams and fraud**: advance payment with no delivery, cloned shops and data theft.
- **Scale and surveillance**: platforms described as large attract the attention of European authorities, and buyers can become the subject of investigations.

If in doubt between yellow and red, red is adopted.

6. Risks for Those Who Access or Interact

- Criminal liability for purchase, possession or importing, in one or more countries.
- Seizure of parcels by customs and the opening of an investigation.
- Harm to health: uncontrolled products, dangerous interactions and overdose, with no medical supervision.
- Loss of money to scams; cryptocurrency payments are rarely recovered.
- Theft of data and of the delivery address, and extortion.
- Malware and phishing.

7. How to Protect Yourself

- **Do not access** it, do not look up the address and do not look for the site.
- Do not click links or accept invitations received through messages, forums or social networks, and do not pass them on.
- Do not record or share the address; record only the risk level.
- Never provide personal data, passwords or payments to anyone offering illegal products or services.
- Keep your system, browser and antivirus up to date and use two-step verification.
- Know the law where you are.
- If someone is being pressured, threatened or blackmailed because of a site like this, contact the police. If there are problems with drug use, seek a health service.
- To obtain medicines, use only licensed pharmacies and the advice of a healthcare professional.

8. If You Accessed It by Mistake

1. Close the tab or window **immediately** and quit Tor Browser. Do not interact with anything.
2. Do not download or open files. If something was downloaded, do not run it, disconnect the device from the network and run an antivirus scan.
3. If you gave a password or personal data, change your passwords from a clean device and turn on two-step verification.
4. If you made a payment, contact your bank or the platform used and log the incident.
5. If you are threatened or blackmailed, do not reply or pay; keep the evidence and contact the police.

9. Legal Notice

This report is informative and does not encourage or guide access to any site. Illegal activity remains illegal on the Tor network, and the authorities have investigative methods that do not depend on breaking the network's anonymity. The descriptions are summaries based on external information, with no evidential value, and this document does not attribute offences to any specific individual.
