Adding a Private property to CanvasRenderingContext2D

I am trying to extend CanvasRenderingContext2D to add a few more methods. I know that it's not a simple matter of using extends because, apparently CanvasRenderingContext2D doesn't permit nor…

javascript class html5-canvas extends — Manngo 17.4k asked 25 mins ago

Why does clicking the icon inside a dynamically added button not trigger my delegated click handler, while clicking the button text does?

I am building a small task list where items are added with JavaScript. Instead of adding a click listener to every button, I added one listener to the list itself. Each item has a delete button with a ...
