Dark Web Hackers

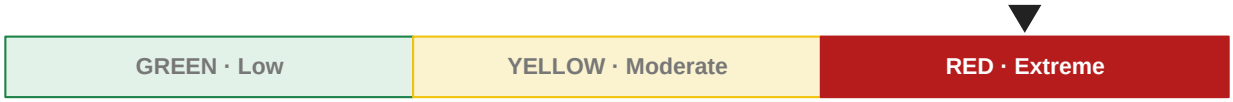
Risk report · Red level · DO NOT ACCESS

Informative report · British English
Prepared without accessing the site · November 2026

RISK LEVEL

RED

EXTREMELY DANGEROUS. This site must NOT be accessed. This report was prepared without accessing the site.



1. Important Notice

- **This site must not be accessed.** No tool, including Tor Browser and a VPN, makes access safe or lawful.
- **The site was not accessed** in preparing this report. There was no visit, registration, purchase, contact or download. The information was obtained **by external means**, from the description provided to the repository's maintainer.
- The information **has not been independently verified**: the site's existence, current state (online or offline) and operators have not been confirmed. As a precaution, the red level is kept even if the site is offline or replaced by a copy.
- The site's address is **not recorded** in this document or in the repository.

2. Site Profile

Field	Information
Site name	Dark Web Hackers
Type of activity	Hiring criminal hackers
Repository category	Dark Web · Illicit marketplace
Risk level	RED · Extreme risk
.onion address	NOT RECORDED
Method of research	External information, without accessing the site
Site status	Not verified
Report date	1 November 2026

3. What the Site Does

Dark Web Hackers was described as a site for **hiring criminal hackers**: a space that presents itself as an intermediary for ordering intrusion services and digital attacks.

This report does not describe techniques, specific services or operators. The site was not accessed, and the information has not been independently verified.

Nature of the activity

- **Criminal services to order**, such as breaking into accounts and devices or attacking third parties.
- **Anonymous brokering** between those who hire and those who claim to provide the service.
- **High potential for harm to real victims**, whose data, money and privacy are exposed.

4. Illustrative Image

Conceptual illustration created for this report. It is not a screenshot, because the site was not accessed.

5. Why It Is Red Level

The red level is applied when there is at least one indicator of extreme danger. In this case:

- **Criminal service**: hiring or funding intrusions is an offence. In the United Kingdom the *Computer Misuse Act 1990* applies; in Brazil, intrusion into a computer device is covered by article 154-A of the Penal Code (Law 12,737/2012).
- **Scams**: many "hackers for hire" advertised on the dark web are frauds that simply take the payment and deliver nothing.
- **Extortion of the client**: whoever hires has a crime to hide and can be blackmailed.
- **Malware**: files, "proof" and programs sent over can infect the device.
- **Real victims**: attacks cause financial and emotional harm to people and companies.

If in doubt between yellow and red, red is adopted.

6. Risks for Those Who Access or Interact

- Criminal liability of the person hiring.
- Loss of money to fraud.

- Blackmail and extortion by the supposed service provider.
- Malware infection and theft of your own data.
- Exposure of identity, conversations and payments.
- Harm to third parties and civil liability.

7. How to Protect Yourself

- **Do not access** it, do not look up the address and do not look for the site.
- Do not click links or accept invitations received through messages, forums or social networks, and do not pass them on.
- Do not record or share the address; record only the risk level.
- Never provide personal data, passwords or payments to anyone offering illegal products or services.
- Keep your system, browser and antivirus up to date and use two-step verification.
- Know the law where you are.
- If someone is being pressured, threatened or blackmailed because of a site like this, contact the police. If there are problems with drug use, seek a health service.

8. If You Accessed It by Mistake

1. Close the tab or window **immediately** and quit Tor Browser. Do not interact with anything.
2. Do not download or open files. If something was downloaded, do not run it, disconnect the device from the network and run an antivirus scan.
3. If you gave a password or personal data, change your passwords from a clean device and turn on two-step verification.
4. If you made a payment, contact your bank or the platform used and log the incident.
5. If you are threatened or blackmailed, do not reply or pay; keep the evidence and contact the police.

9. Legal Notice

This report is informative and does not encourage or guide access to any site. Illegal activity remains illegal on the Tor network, and the authorities have investigative methods that do not depend on breaking the network's anonymity. The descriptions are summaries based on external information, with no evidential value, and this document does not attribute offences to any specific individual.
