DarkMining

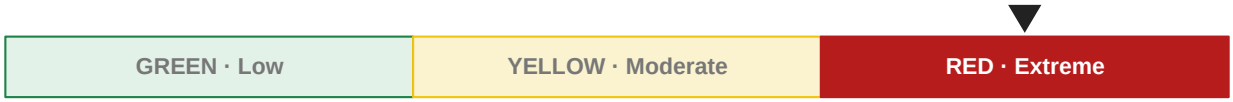
Risk report · Red level · DO NOT ACCESS

Informative report · British English
Prepared without accessing the site · November 2026

RISK LEVEL

RED

EXTREMELY DANGEROUS. This site must NOT be accessed. This report was prepared without accessing the site.



1. Important Notice

- **This site must not be accessed.** No tool, including Tor Browser and a VPN, makes access safe or lawful.
- **The site was not accessed** in preparing this report. There was no visit, registration, purchase, contact or download. The information was obtained **by external means**, from the description provided to the repository's maintainer.
- The information **has not been independently verified**: the site's existence, current state (online or offline) and operators have not been confirmed. As a precaution, the red level is kept even if the site is offline or replaced by a copy.
- The site's address is **not recorded** in this document or in the repository.

2. Site Profile

Field	Information
Site name	DarkMining
Type of activity	Bitcoin mining with stolen electricity
Repository category	Dark Web · Illicit marketplace
Risk level	RED · Extreme risk
.onion address	NOT RECORDED
Method of research	External information, without accessing the site
Site status	Not verified
Report date	1 November 2026

3. What the Site Does

DarkMining was described as a site linked to **bitcoin mining with stolen electricity**: an activity in which the heavy energy consumption that cryptocurrency mining demands is paid for through illegal connections or by diverting other people's power.

From the information available, it is not known whether the site offers services, sells shares or merely publicises the activity. These points have not been verified, because the site was not accessed.

Nature of the activity

- **Theft of electricity**: the cost of the operation is shifted onto others.
- **Use of cryptocurrency** to make a profit and make the money harder to trace.
- **Harm to others**: utilities and consumers foot the bill, and illegal connections can cause overloads, fires and accidents.

4. Illustrative Image

Conceptual illustration created for this report. It is not a screenshot, because the site was not accessed.

5. Why It Is Red Level

The red level is applied when there is at least one indicator of extreme danger. In this case:

- **Theft of electricity**: using diverted electricity is an offence. In the United Kingdom the *Theft Act 1968* punishes the dishonest use of electricity; in Brazil, electricity is treated as movable property under article 155 of the Penal Code.
- **Taking part in or funding** the activity can amount to complicity, handling stolen goods or money laundering.
- **Investment scams**: offers of "mining" or of cryptocurrency earnings are fertile ground for fraud, with promises of guaranteed profit.
- **Safety risk**: illegal electrical installations and overloaded equipment cause fires.
- **Traps and surveillance**: the authorities follow cryptocurrency trails and abnormal energy consumption.

If in doubt between yellow and red, red is adopted.

6. Risks for Those Who Access or Interact

- Criminal liability for theft of electricity, handling stolen goods or money laundering.
- Loss of money to investment scams; cryptocurrency transactions are rarely reversed.
- Fake mining software that may contain malware, use your computer without permission ("cryptojacking") or steal wallets.
- Data theft and extortion.
- Risk of fire and accidents in illegal installations.
- Exposure to financial investigations.

7. How to Protect Yourself

- **Do not access** it, do not look up the address and do not look for the site.
- Do not click links or accept invitations received through messages, forums or social networks, and do not pass them on.
- Do not record or share the address; record only the risk level.
- Never provide personal data, passwords or payments to anyone offering illegal products or services.
- Keep your system, browser and antivirus up to date and use two-step verification.
- Know the law where you are.
- If someone is being pressured, threatened or blackmailed because of a site like this, contact the police. If there are problems with drug use, seek a health service.
- If you know of illegal electricity connections, tell the utility company and the authorities.

8. If You Accessed It by Mistake

1. Close the tab or window **immediately** and quit Tor Browser. Do not interact with anything.
2. Do not download or open files. If something was downloaded, do not run it, disconnect the device from the network and run an antivirus scan.
3. If you gave a password or personal data, change your passwords from a clean device and turn on two-step verification.
4. If you made a payment, contact your bank or the platform used and log the incident.
5. If you are threatened or blackmailed, do not reply or pay; keep the evidence and contact the police.

9. Legal Notice

This report is informative and does not encourage or guide access to any site. Illegal activity remains illegal on the Tor network, and the authorities have investigative methods that do not depend on breaking the network's anonymity. The descriptions are summaries based on external information, with no evidential value, and this document does not attribute offences to any specific individual.
