Dark Web Level Reassessments

Dark Web · reassessment process and record of reassessment no. 1 (version 1.1)

Technical documentation · British English
6 November 2026

1. Introduction and Purpose

The risk classification of a dark web site is not permanent: sites go down, change hands, change address and change behaviour, and new information emerges. **Reassessment** keeps the levels (green, yellow, red and unknown) current and the access conduct appropriate. This documentation defines **when and how to reassess**, which level changes are possible and who does what, and records **reassessment no. 1**, which produced version 1.1 of the dark web report.

Important notice: red-level sites must not be accessed, and no reassessment requires accessing them. This document contains no .onion addresses and cites sites by name only (the identifier appears in the record tables).

2. When to Reassess

Periodic deadlines

Level	Reassessment deadline	Note
GREEN	Every 30 days	Also reassess at any suspicious sign
YELLOW	Every 15 days	Extra caution; shorter deadline
RED	Kept until there is clear evidence to the contrary	Any downgrade requires careful review, without accessing the site
UNKNOWN	Every 30 days	Inactive after 90 days offline (suggestion); keep the record

Event-driven reassessment

Besides the deadlines, reassess a site immediately when there is:

- a change of address, operator or content;
- a reliable report of a scam, malware, compromise or illegal content;
- new information about a site of unknown risk, or an offline site that comes back;
- a decision by the repository's maintainer or an inconsistency noticed between documents.

3. Principle: Safety First

Level changes follow a deliberate asymmetry: **downgrading is quick, upgrading is slow**. One reliable sign of danger is enough to raise the risk level; lowering it requires verifiable evidence. If in doubt, the more cautious level is adopted.

Change	Condition and evidence required
Unknown → Green	Operator identified, address confirmed with an official source and stable operation (all green criteria)
Unknown → Yellow	Partial evidence, with no clear sign of danger
Unknown → Red	A clear sign of danger: scam, malware, illegal content or trade
Green → Yellow	Change of address or operator, an isolated report or doubt: if in doubt, downgrade
Yellow → Green	Demonstration of all the green-level criteria
Green or Yellow → Red	Signs of a scam, malware, illegal content or trade
Red → another level	Only with clear, verifiable evidence, after careful review, without anyone needing to access the site
Any level → Unknown	Site offline or loss of the concrete information supporting the classification

4. Reassessment Procedure

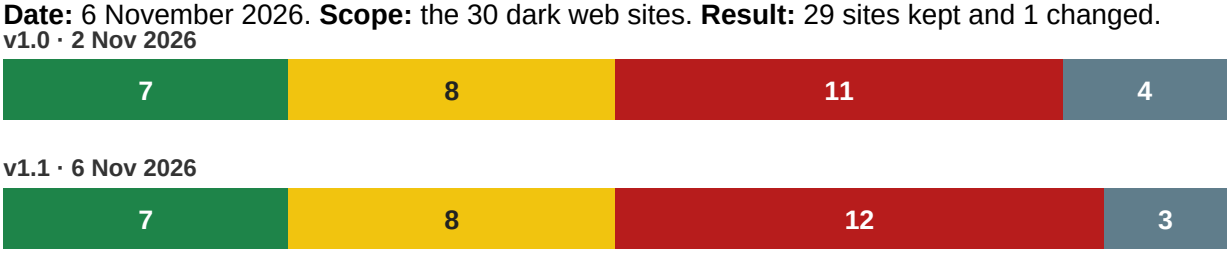
1. **Select** the sites to reassess, by deadline or by event.
2. **Gather information without accessing the site**, through the Surface Web: the organisation's official site, the press, security researchers and reports from trusted communities. Access is considered only for green or yellow sites, with the level's precautions.
3. **Compare** the evidence with the criteria of the current level and of the other levels.
4. **Decide** the level. The decision belongs to the repository's maintainer.
5. **Record** the reassessment on the form, with the evidence, the source and the date.
6. **Update** the documents affected: the dark web report, maps, risk notices and, for red sites, the individual report.
7. **Set** the date of the next reassessment.

Reassessment Record Form

Field	Entry
Site / identifier	_____
Date of reassessment	____ / ____ / _____
Reason for reassessment	[ ] Schedule [ ] Event: _____
Previous level	[ ] Green [ ] Yellow [ ] Red [ ] Unknown
New level	[ ] Green [ ] Yellow [ ] Red [ ] Unknown
Evidence and source	_____
Decided by	_____
Documents updated	[ ] Report [ ] Maps [ ] Notice [ ] Individual report
Next reassessment	____ / ____ / _____

5. Record of Reassessment No. 1 · Version 1.1

Date: 6 November 2026. **Scope:** the 30 dark web sites. **Result:** 29 sites kept and 1 changed.



Level	Version 1.0	Version 1.1	Change
GREEN	7	7	0
YELLOW	8	8	0
RED	11	12	**+1**
UNKNOWN	4	3	**-1**
Total	**30**	**30**	0

Change Made

Site	Identifier	Category	Previous	Current
Bipharma	**DARK-012-Bipharma**	Illegal Markets	UNKNOWN	RED

- **Bipharma** moved from **unknown to red**, by decision of the repository's maintainer.
- **Reason and evidence**: not supplied to the author of this document. According to the unknown-level notice, reclassifying to red requires a clear sign of danger; the evidence should be recorded on the form.
- **Description**: "possible trade in pharmaceutical products" was inferred from the name (†) and must be confirmed.

Consequences for Bipharma

- **Never access**; no tool makes access safe or lawful.
- The **address is never recorded**.
- **Individual report pending**: it must be prepared, without accessing the site, like the other 11 red sites.
- Dark web report (v1.1) and maps updated.

Status of All Sites

Identifier	Category	Before	After	Status
DARK-001-DCdutchconnectionUK	Illegal Markets	RED	RED	Kept
DARK-002-DrChronic	Illegal Markets	RED	RED	Kept
DARK-003-TomAndJerry	Illegal Markets	RED	RED	Kept
DARK-004-420Prime	Illegal Markets	RED	RED	Kept
DARK-005-Dark-Web-Hackers	Illegal Markets	RED	RED	Kept
DARK-006-AccMarket	Illegal Markets	RED	RED	Kept
DARK-007-DarkMining	Illegal Markets	RED	RED	Kept

DARK-022-Dark-Mixer	Bitcoin & Cryptocurrency	YELLOW	YELLOW	Kept
DARK-023-EasyCoin	Bitcoin & Cryptocurrency	YELLOW	YELLOW	Kept
DARK-024-MixaBit	Bitcoin & Cryptocurrency	YELLOW	YELLOW	Kept
DARK-025-OnionWallet	Bitcoin & Cryptocurrency	UNKNOWN	UNKNOWN	Kept
DARK-026-VirginBitcoin	Bitcoin & Cryptocurrency	UNKNOWN	UNKNOWN	Kept
DARK-027-Bible4u	Other Services	GREEN	GREEN	Kept
DARK-028-CIA	Other Services	GREEN	GREEN	Kept
DARK-029-Onion-Share	Other Services	GREEN	GREEN	Kept
DARK-030-Cryptostorm	Other Services	GREEN	GREEN	Kept

6. Responsibilities

Who	Role in reassessment
Repository maintainer	Decides each site's level and the access conduct
Grok	Coordinates the reassessment and checks that the rules are applied and the documents agree
Claude	Documents: record form, reports and notices
ChatGPT	Maintains the organisation: identifiers, structure and categories
Gemini	Helps search for information and for new candidates
Tor Browser and Mullvad VPN	Access and protection tools, used only on green and yellow sites

7. Next Reassessments

Suggested dates, counted from reassessment no. 1:

Group	Sites	Next reassessment
Yellow	8	21 November 2026
Green	7	6 December 2026
Unknown	3	6 December 2026
Red	12	Kept until there is clear evidence to the contrary

8. Limitations and Legal Notice

- The classifications were supplied by the repository's maintainer and have not been independently verified by the author of this document.
- The deadlines and dates are suggestions and may be adjusted to the repository's process.
- This document does not list addresses, does not recommend accessing sites and is no substitute for legal advice.

Using Tor is lawful in most countries, but everyone must know and comply with the law where they are. Illegal activity remains illegal on the Tor network.

9. Related Documents

- Dark Web Report v1.1 and the Dark Web and Complete maps (v1.1).
- Risk notices: green, yellow, red and unknown.
- Individual reports for the red sites.
- Documentation for Tor Browser, Mullvad VPN and the AI tools.
