AccMarket

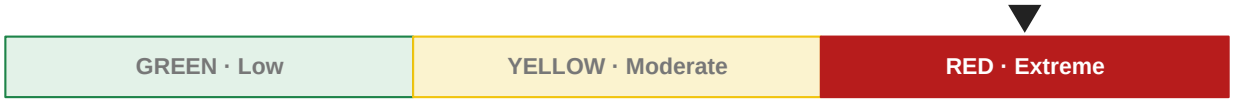
Risk report · Red level · DO NOT ACCESS

Informative report · British English
Prepared without accessing the site · November 2026

RISK LEVEL

RED

EXTREMELY DANGEROUS. This site must NOT be accessed. This report was prepared without accessing the site.



1. Important Notice

- **This site must not be accessed.** No tool, including Tor Browser and a VPN, makes access safe or lawful.
- **The site was not accessed** in preparing this report. There was no visit, registration, purchase, contact or download. The information was obtained **by external means**, from the description provided to the repository's maintainer.
- The information **has not been independently verified**: the site's existence, current state (online or offline) and operators have not been confirmed. As a precaution, the red level is kept even if the site is offline or replaced by a copy.
- The site's address is **not recorded** in this document or in the repository.

2. Site Profile

Field	Information
Site name	AccMarket
Type of activity	Sale of premium PayPal, eBay and bank accounts
Repository category	Dark Web · Illicit marketplace
Risk level	RED · Extreme risk
.onion address	NOT RECORDED
Method of research	External information, without accessing the site
Site status	Not verified
Report date	1 November 2026

3. What the Site Does

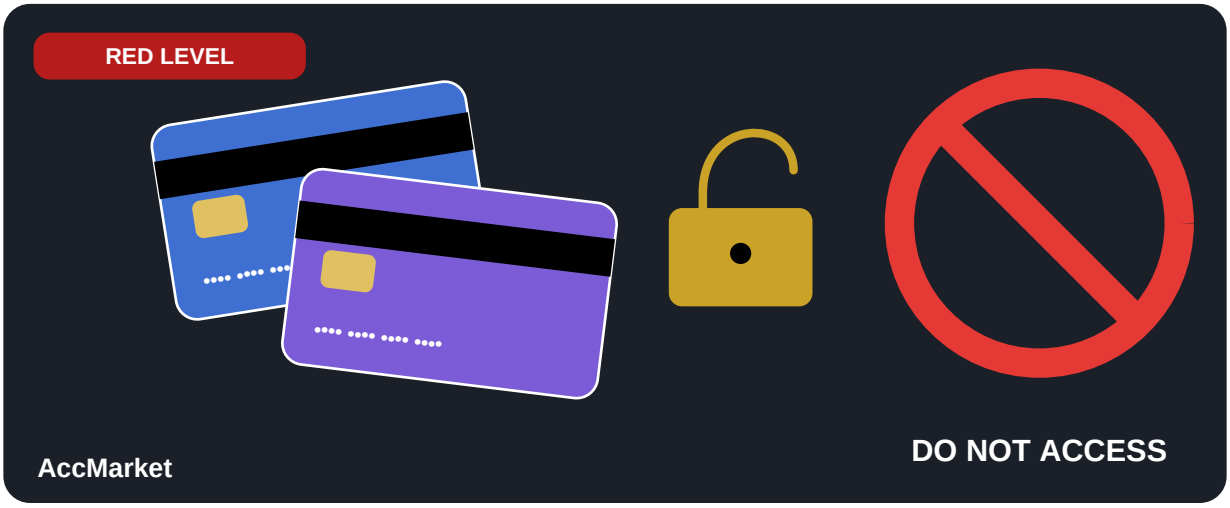
AccMarket was described as a site for the **sale of premium accounts** of services such as PayPal and eBay and of **bank accounts**: a platform offering access to other people's accounts.

Offers of this kind usually involve accounts obtained unlawfully, through stolen credentials, phishing or data leaks. PayPal and eBay are independent companies, victims of this type of fraud, and have no connection with the site. The report does not detail how it works, because the site was not accessed.

Nature of the activity

- **Trade in access to accounts** belonging to other people.
- **Financial fraud**: the accounts can be used to divert money, buy in the victim's name or launder funds.
- **Real victims**: the original holders lose money, data and trust.

4. Illustrative Image



Conceptual illustration created for this report. It is not a screenshot, because the site was not accessed.

5. Why It Is Red Level

The red level is applied when there is at least one indicator of extreme danger. In this case:

- **Fraud and financial crime**: buying or using other people's accounts is an offence (for example under the *Fraud Act 2006* in the United Kingdom, and as fraud and electronic fraud in Brazil).
- **Possible money laundering**: the user can become the subject of an investigation by moving funds of unlawful origin.
- **The buyer is a target too**: they may be deceived, have their data stolen or receive accounts that are already blocked.
- **Sensitive data**: contact with the site exposes personal and financial details.
- **Traps and surveillance**: the trade in accounts is a priority target of investigations.

If in doubt between yellow and red, red is adopted.

6. Risks for Those Who Access or Interact

- Criminal liability for fraud, handling stolen goods or money laundering.
- Loss of money to scams.
- Blocking of accounts and of access to financial services.
- Theft of the buyer's own data.
- Malware and phishing.
- Harm to third parties and civil liability.

7. How to Protect Yourself

- **Do not access** it, do not look up the address and do not look for the site.
- Do not click links or accept invitations received through messages, forums or social networks, and do not pass them on.
- Do not record or share the address; record only the risk level.
- Never provide personal data, passwords or payments to anyone offering illegal products or services.
- Keep your system, browser and antivirus up to date and use two-step verification.
- Know the law where you are.
- If someone is being pressured, threatened or blackmailed because of a site like this, contact the police. If there are problems with drug use, seek a health service.

8. If You Accessed It by Mistake

1. Close the tab or window **immediately** and quit Tor Browser. Do not interact with anything.
2. Do not download or open files. If something was downloaded, do not run it, disconnect the device from the network and run an antivirus scan.
3. If you gave a password or personal data, change your passwords from a clean device and turn on two-step verification.
4. If you made a payment, contact your bank or the platform used and log the incident.
5. If you are threatened or blackmailed, do not reply or pay; keep the evidence and contact the police.

9. Legal Notice

This report is informative and does not encourage or guide access to any site. Illegal activity remains illegal on the Tor network, and the authorities have investigative methods that do not depend on breaking the network's anonymity. The descriptions are summaries based on external information, with no evidential value, and this document does not attribute offences to any specific individual.
