USFakeID

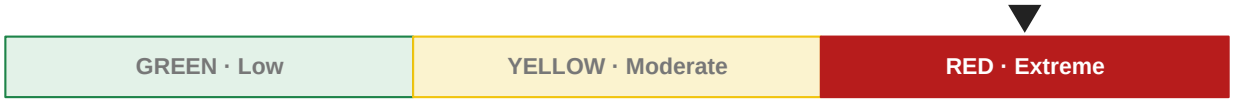
Risk report · Red level · DO NOT ACCESS

Informative report · British English
Prepared without accessing the site · November 2026

RISK LEVEL

RED

EXTREMELY DANGEROUS. This site must NOT be accessed. This report was prepared without accessing the site.



1. Important Notice

- **This site must not be accessed.** No tool, including Tor Browser and a VPN, makes access safe or lawful.
- **The site was not accessed** in preparing this report. There was no visit, registration, purchase, contact or download. The information was obtained **by external means**, from the description provided to the repository's maintainer.
- The information **has not been independently verified**: the site's existence, current state (online or offline) and operators have not been confirmed. As a precaution, the red level is kept even if the site is offline or replaced by a copy.
- The site's address is **not recorded** in this document or in the repository.

2. Site Profile

Field	Information
Site name	USFakeID
Type of activity	Shop selling fake US identity documents
Repository category	Dark Web · Illicit marketplace
Risk level	RED · Extreme risk
.onion address	NOT RECORDED
Method of research	External information, without accessing the site
Site status	Not verified
Report date	1 November 2026

3. What the Site Does

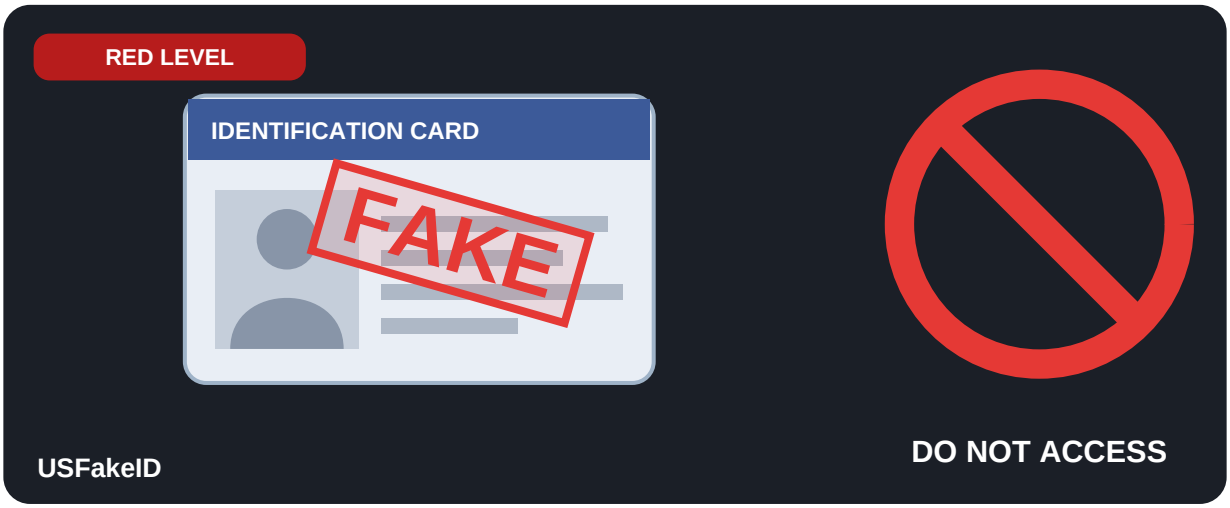
USFakeID was described as a **shop selling fake United States identity documents**: a platform offering counterfeit identification that imitates documents issued in that country.

This report does not detail products, prices or operators, because the site was not accessed and the information has not been independently verified.

Nature of the activity

- **Forgery of identification documents**, which are public documents.
- **Collection of buyers' personal data**, such as name, photograph, address and payment details.
- **Enabling other crimes**: fake documents are used in fraud and to conceal identity.

4. Illustrative Image



Conceptual illustration created for this report. It is not a screenshot, because the site was not accessed.

5. Why It Is Red Level

The red level is applied when there is at least one indicator of extreme danger. In this case:

- **Forgery and identity fraud**: producing, selling, possessing or using false identification documents is an offence in the United States, at federal level (for example 18 U.S.C. § 1028) and state level. In Brazil, forgery and the use of a false document are offences under articles 297 and 304 of the Penal Code.
- **Handing data to criminals**: the buyer supplies exactly the material needed for identity theft and extortion.
- **Scams**: advance payment with no delivery is one of the most common outcomes.
- **Liability for later use**: whoever uses the document may also answer for the crimes it enables.
- **Traps and surveillance**: the authorities monitor offers of this kind.

If in doubt between yellow and red, red is adopted.

6. Risks for Those Who Access or Interact

- Criminal liability for possessing, buying or using a false document.

- Identity theft and misuse of your data and photograph.
- Loss of money to scams.
- Extortion with threats of reporting or exposure.
- Malware and phishing.
- Consequences for immigration, work and study if discovered.

7. How to Protect Yourself

- **Do not access** it, do not look up the address and do not look for the site.
- Do not click links or accept invitations received through messages, forums or social networks, and do not pass them on.
- Do not record or share the address; record only the risk level.
- Never provide personal data, passwords or payments to anyone offering illegal products or services.
- Keep your system, browser and antivirus up to date and use two-step verification.
- Know the law where you are.
- If someone is being pressured, threatened or blackmailed because of a site like this, contact the police. If there are problems with drug use, seek a health service.
- If you need an identification document, obtain it only from the official issuing body.

8. If You Accessed It by Mistake

1. Close the tab or window **immediately** and quit Tor Browser. Do not interact with anything.
2. Do not download or open files. If something was downloaded, do not run it, disconnect the device from the network and run an antivirus scan.
3. If you gave a password or personal data, change your passwords from a clean device and turn on two-step verification.
4. If you made a payment, contact your bank or the platform used and log the incident.
5. If you are threatened or blackmailed, do not reply or pay; keep the evidence and contact the police.

9. Legal Notice

This report is informative and does not encourage or guide access to any site. Illegal activity remains illegal on the Tor network, and the authorities have investigative methods that do not depend on breaking the network's anonymity. The descriptions are summaries based on external information, with no evidential value, and this document does not attribute offences to any specific individual.
